

2010 PLANT SUPPLIER LIST

This is an eclectic list of plant suppliers, listed regionally which members may find useful when planning a 'plant search' outing! The list is confined to areas which can be reached in a day's outing, therefore does not include suppliers in the far reaches of our province. The list focuses on family-owned businesses each of which was recommended. The list is in no way complete and if you have other recommendations, they could be added to the list. Every effort was made to contact the supplier directly to ensure correct information. In other cases individual websites or google searches were relied upon for information.

Please note we cannot assume responsibility for plant viability or misinformation.

Complete driving directions to specific sites are usually included in individual websites. It is highly recommended you check the websites for updated information. Some businesses offer discounts to garden club members. If you don't see it mentioned in these listings, you could always ask.
